EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Chris Ries on December 18, 2008.

2. The application has been amended as follows:

In claim 1, line 20; replace "characteristic parameter" with --parameter characteristic of the flowrate--.

In claim 8, line 11, replace "pahse" with --phase--.

In claim 8, line 16; replace "characteristic parameter" with --parameter characteristic of the flowrate--.

Reasons for Allowance

3. Claims 1-3, 6, 8, and 11-13 are allowed. The following is an examiner's statement of reasons for allowance.

4. Regarding claim 1, the prior art fails to disclose or fairly suggest a device for producing images of an object that is subject to a cyclic spontaneous movement and for controlling an injection rate of a contrast agent in a vascular system of the object, including a control unit that is

Art Unit: 2882

coupled to the injection pump and the flowrate parameter characteristic measuring device, the control unit configured to drive the injection pump as a function of a particular value of the parameter characteristic of the flowrate in such a way that (i) the contrast agent follows a predetermined concentration pattern in the vascular system, (ii) the injection rate of the contrast agent is matched to instantaneous flow conditions in the vascular system, and (iii) a total amount of contrast agent injected is limited to a necessary minimum, the necessary minimum being defined by the predetermined concentration pattern, the predetermined concentration pattern further being specified to produce a constant contrast display of the vascular system while pictures are being taken of the object during a duration of the contrast agent injection, in combination with all of the other limitations in the claim. Claims 2-3 and 6 are allowed by virtue of their dependency.

5. Regarding claim 8, the prior art fails to disclose or fairly suggest a method of producing an image of an object that is subject to cyclic spontaneous movement and for controlling an injection rate of a contrast agent in a vascular system of the object, including controlling the injection pump as a function of a particular value of the parameter characteristic of the flowrate in such a way that (i) the contrast agent follows a predetermined concentration pattern in the vascular system, (ii) the injection rate of the contrast agent is matched to instantaneous flow conditions in the vascular system, and (iii) a total amount of contrast agent injected is limited to a necessary minimum, the necessary minimum being defined by the predetermined concentration pattern, the predetermined concentration pattern further being specified to produce a constant contrast display of the vascular system while pictures are being taken of the object during a

duration of the contrast agent injection, in combination with all of the other limitations in the claim. Claims 11-13 are allowed by virtue of their dependency.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
